Profile

Motivated and data-driven aspiring software engineer with strong foundations in mathematics, full-stack development, and system architecture. Passionate about building scalable systems and solving real-world problems using logic and modern technologies.

Education

Ongoing **BS Management Sciences**, Mount Vernon Nazaren University, Ohio
2024–2026 **ADP Computer Science**, IAC Lahore

Projects

Pakistan Events Website

- Developed platform for cultural events in
- Pakistan Includes reminders and social sharing
- Built using Node.js & TypeScript

SortingHub – DSA Visualizer

- Interactive visualization of sorting algorithms
- Step-by-step execution with complexity
- analysis Built using Python & C++

Skills

Technical Python, C++, JavaScript, PHP, SQL, HTML, CSS
Domain System Design, Data Analysis, AI Prompt Engineering

Core Strengths

Problem Solving, Analytical Thinking, Full-Stack Development, Continuous Learning

Additional

- Open to internships & expert level job
- Interest in using AI tools and system design, scalable systems
